## List of Prioritized Risks for A platform of errand delivery Service in the same city based on crowdsourcing model

**Prepared by:** Ying He

**Date:**8 Dec 2018

Ranking	Potential Risk
1	Too many requirements from clients and too many requirements changes.
2	Unpractical progress, the required development time is too short.
3	Power failure, product development stagnation due to power cuts or failures.
4	Natural disaster, such as the impact of natural disasters on production.
5	Information security risk.
6	Developers only have some energy to invest in the project.
7	Developers have no ability to complete the project, they may need time to learn new development technology.
8	Unclear and incomplete needs from client.
9	Test case is defective, incomplete test cases lead to incomplete product testing at a later stage.
10	Developers lack relevant skills and experience. Developers need more time to explore, they may not complete the task on time.
