

Status/Progress Report

Project:

A platform of errand delivery Service in the same city based on crowdsourcing model

Status/Progress Report

<p>Project Name: A platform of errand delivery Service in the same city based on crowdsourcing model</p> <p>Team Member Name: Zhangyi Shen</p> <p>Date:Mar.18,2019</p> <p>Reporting Period: in the stage of project development</p>
<p>Work completed this reporting period:</p> <p>I completed the front-end code of the Web-based management system, and the interface and debugging of the registration, login, and query order functions with the backend.</p>
<p>Work to complete next reporting period:</p> <p>Complete the function of querying, pulling in, and pulling out the blacklist on the platform side.</p>
<p>What's going well and why:</p> <p>When joint debugging at the front and rear ends, we will have interface documents, normalize the interface, which is convenient for our operation and improve work efficiency.</p>
<p>What's not going well and why:</p> <p>We have some problems connecting to the database, but we solved this problem through cooperation.</p>
<p>Suggestions/Issues:</p> <p>Database connection is not work well.</p>
<p>Project changesWe use a front-end separation development model, with a background to support two Android applications and a Web-based platform management system.</p>
