Status/Progress Report

Project:

A platform of errand delivery Service in the same city based on crowdsourcing model

Status/Progress Report

Project Name: A platform of errand delivery Service in the same city based on crowdsourcing model Team Member Name: Zhangyi Shen Date: Apr.30,2019 Reporting Period: the end of project
Work completed this reporting period: Completed the front-end joint debugging and testing of all functions of the background management platform.
Work to complete next reporting period: Sorting documents.
What's going well and why: The development of all the basic functions was successfully completed, and the tacit understanding between the players was getting higher and higher.
What's not going well and why: We have some features with lower priority that are not implemented.
Suggestions/Issues: We should set up a dedicated project manager to synchronize progress and drive development.
Project changes Because of plan delay, we reduced the time for document sorting.
