Issue Log

Project:

A platform of errand delivery Service in the same city based on crowdsourcing model

Date	Version	Editor	Notes
Jan 20 2018	v1	Ying He	
Feb 01 2019	v2	Ying He	Add an issue.
Feb 07 2019	v3	Ying He	Add an issue.

Issue Log

Prepared by: **Ying He**   **Date: Jan 20 2019**

Issue #	Issue Description	Impact on Project	Date Reported	Reported By	Assigned To	Priority (M/H/L)	Due Date	Status	Comments
1	When developing on Android, we can't connect to MySQL database with JDBC.	If we can't connect to the database, we won't be able to process the data.	Jan 20 2019	Bin Ren Congyu Cai	Bin Ren Congyu Cai	H	Feb 01 2019	Solved	We changed the way to connect to the database. We write an API to connect the database.
2	At the beginning of the project, our management model was unreasonable and caused the members' progress to be uneven.	Poor progress can lead to delays in the overall progress of the project.	Feb 01 2019	Bin Ren Congyu Cai Ying He Zhangyi Shen	Bin Ren Congyu Cai Ying He Zhangyi Shen	H	Feb 03 2019	Solved	We changed the development model and all members developed a function to ensure that this function was implemented before developing the next feature.
3	In the development of the front-end, we are slow to use Java development.	May cause delays in the overall progress of the project.	Feb 07 2019	Bin Ren Congyu Cai	Bin Ren Congyu Cai	H	Feb 15 2019	Solved	We chose to develop front-end interfaces in HTML, which is more efficient and easier to connect to the database.
